

# Wow with a top knot!

Halle Berry

## Lifts features: a teased knot

**To do:** Place hair in a high ponytail, tease hair in the tail, then loosely wrap it around the base of the pony and pin into place. Gently tug on ½" sections of hair within the knot for a messy, undone finish; set with hair spray.

Jennifer Lopez

## Slims the face: a messy knot

**To do:** Leave out a 2" front section of hair on each side, secure the rest into a loose high knot, then curl tendrils with a 1" curling iron. Set with hair spray.

It's no surprise that donning a sky-high top knot is a chic way to beat the summer heat. But as these A-listers prove, the versatile 'do can also be fashioned into many easy-to-achieve, age-defying styles, says celebrity hairstylist Daniel Koye. "A voluminous knot directs the eye up for a face-lift effect, a knot with loose tendrils 'contours' cheeks and a sleek knot 'stretches' the neck!" Find the style that flatters YOU best

Julianne Moore

## Elongates the neck: a 'sumo' knot

**To do:** Brush hair up into a high pony; tie the tail into a tight knot and pin into place. Spritz a clean toothbrush with hair spray and use it to comb and smooth flyaways.
